BOOK SYNOPSIS

The definitive reference for space engineers on rendezvous and docking/berthing (RVD/B) related issues, this book answers key questions such as: How does the docking vehicle accurately approach the target spacecraft? What technology is needed aboard the spacecraft to perform automatic rendezvous and docking, and what systems are required by ground control to supervise this process? How can the proper functioning of all rendezvous-related equipment, systems and operations be verified before launch? The book provides an overview of the major issues governing approach and mating strategies, and system concepts for rendezvous and docking/berthing. These issues are described and explained such that aerospace engineers, students and even newcomers to the field can acquire a basic understanding of RVD/B. The author would like to extend his thanks to Dr Shufan Wu, GNC specialist and translator of the books Chinese edition, for his help in the compilation of these important errata.

AUTOMATED RENDEZVOUS AND DOCKING OF SPACECRAFT CAMBRIDGE AEROSPACE SERIES - Are you looking for Ebook Automated Rendezvous And Docking Of Spacecraft Cambridge Aerospace Series ? You will be glad to know that right now Automated Rendezvous And Docking Of Spacecraft Cambridge Aerospace Series is available on our online library. With our online resources, you can find Applied Numerical Methods With Matlab Solution Manual 3rd Edition or just about any type of ebooks, for any type of product.

Best of all, they are entirely free to find, use and download, so there is no cost or stress at all. Automated Rendezvous And Docking Of Spacecraft Cambridge Aerospace Series may not make exciting reading, but Applied Numerical Methods With Matlab Solution Manual 3rd Edition is packed with valuable instructions, information and warnings.
