BOOK SYNOPSIS

This comprehensive book is the definitive clinical resource on the application of corneal topography & how it is utilized to improve surgical technique. The descriptions of over 500 color corneal topography maps are complete & concise. Individual aspects of each map are outlined with thorough explanations. The text describes maps in detail for both pre- & post-surgery & how they indicate procedures for holmium, hyperopic PRK, & LASIK. Both American & international authors present extensive & comprehensive clinical cases so you can compare different diagnostic & prognostic approaches & easily learn all the secrets of videokeratoscopy practice.
